PROFILE

I am an experienced backend developer around 1 year of experience in developing and maintaining high-performance systems. I am looking for an opportunity to set myself a new goal, where I can be innovative and attain a challenging position by utilizing my interpersonal skills to the fullest for the growth of the organization and myself in this innovative and competitive world.

NEXT BIG TECHNOLOGY PVT. LTD. • FEB 2024 - PRESENT

Laravel Developer • Bhawani Nagar, Jaipur, Rajasthan

PROJECTS

1. DIGI HOMES (REAL ESTATE PLATFORM):

Developed a property listing and booking system with search filters. Includes **Admin** panel for management and **Agent** panel for listings. Supports Google Login, property listings, client interactions, and Google Places.

2. SCHOOL MANAGEMENT SYSTEM:

Developed a system to manage students, teachers, attendance, exams, and reports. Includes **Admin** panel for overall management, **Student** panel for accessing study materials and results, and **Parent** panel for monitoring attendance and performance.

3. WOYE (MULTI-VENDOR WEB & APP):

Developed a multi-vendor platform with **Admin**, **Restaurant**, **Pharmacy**, and **Grocery** panels. Implemented multi-vendor authentication and integrated a third-party location API. Built RESTful APIs for smooth communication and data sync across panels. Applied multiple Cron jobs and job scheduling to automate email sending.

D2 CODE LAB TECHNOLOGIES • JUN 2023 - FEB 2024

Laravel Developer • Reliance Petrol Pump, Ellenabad, Haryana

PROJECTS

1. PRODUCT MANAGEMENT SYSTEM:

Built a robust product management platform with role-based access control, allowing different user roles (admin, user, vendor) to manage products, categories, and inventory efficiently.

2. E-MAIL SYSTEM:

In this project I have use three technologies like Laravel, JavaScript, Ajax by which we send a bulk email to all selected user which has been imported through excel. In this project import bulk data through csv and sending bulk e-mail.t
