PROFILE

I am an **experienced Back-End Developer** with around **2 years of experience** in developing and maintaining high-performance, scalable systems. I am seeking an opportunity to take on challenging projects, apply my problem-solving and technical skills, and contribute to the growth of the organization while continuing to enhance my expertise in a dynamic and competitive environment.

WORK EXPERIENCE

NEXT BIG TECHNOLOGY PVT. LTD. • FEB 2024 – PRESENT

Back-End Developer • Bhawani Nagar, Jaipur, Rajasthan

PROJECTS

1. DIGI HOMES (REAL ESTATE PLATFORM):
Developed a property listing and booking system with search filters.
Includes **Admin** panel for management and **Agent** panel for listings.
Supports Google Login, property listings, client interactions, and Google Places.

2. SCHOOL MANAGEMENT SYSTEM:
Developed a system to manage students, teachers, attendance, exams, and reports.
Includes **Admin** panel for overall management, **Student** panel for accessing study materials and results, and **Parent** panel for monitoring attendance and performance.

3. WOYE (MULTI-VENDOR WEB & APP):
Developed a multi-vendor platform with **Admin, Restaurant, Pharmacy, and Grocery** panels.
Implemented multi-vendor authentication and integrated a third-party location API.
Built RESTful APIs for smooth communication and data sync across panels.
Applied multiple Cron jobs and job scheduling to automate email sending.

D2 CODE LAB TECHNOLOGIES • SEP 2023 – FEB 2024

Back-End Developer • Reliance Petrol Pump, Ellenabad, Haryana

PROJECTS

1. PRODUCT MANAGEMENT SYSTEM:
Built a robust product management platform with role-based access control, allowing different user roles (admin, user, vendor) to manage products, categories, and inventory efficiently.

2. E-MAIL SYSTEM:
In this project I have use three technologies like Laravel, JavaScript, Ajax by which we send a bulk email to all selected user which has been imported through excel.
In this project import bulk data through csv and sending bulk e-mail.
